

# INDUSTRIAL MACHINE

OKURMA®

## OKURMA/OKM-0311DCX

SIMPLE DIRECT DRIVE THE  
COMPOUND FEEDING THICK  
LOCK-STITCH (INTEGRATED)

### FEATURES:

This machine adopts link-feed mechanism, feed balance, expanded category of sewing materials and a larger potential shift in the thick seam of material, in the sewing process can sed fluxes on the lower reach consensus, use of mounted direct drive servo motor to achieve a fast start and brake the machine precision, the machine adopted advanced computer-controlled technology, stable performance, anti-interference ability. Collude line with big hook to save the time of bottom line changing, improved efficiency, the use of automatic seam, auto thread trimming, auto reverse sewing, m auto needle positioning. For sewing thick materials, bags, leather and leathered products.

### SPECS SCHEDULE:

						
OKM-0311DCX	DP x 17 20#~23#	2500 r.p.m.	8~12 mm	8~16 mm	37 mm	Large rotating hook
